

ZON has been the leader in the automatic scarecrow industry for over 50 years. Over the years, ZON has incorporated the latest technology into their design. Time-proven and field-tested, ZON products have been accepted world-wide for their durability and reliability. Over one million units have been sold!

HOW DOES ZON WORK?

The ZON automatic Scarecrow Gun utilizes the explosive power of propane gas ignition to create a loud shot-like sound to scare away birds and predators. The volume of the noise can be increased from 100-120 decibels. The interval between detonations can be adjusted from under 2 minutes, up to 30 minutes.

- **FULLY AUTOMATIC:**

The ZON Gun practically runs itself with the optional timer. The timer automatically starts and stops the detonations at the desired time, each day. It will run a full season on just one 1.5 volt battery!

- **COST EFFECTIVE:**

A 20 lb. propane gas tank has the capacity to fire 17,000 detonations. The cost of operating a ZON Gun is just a few cents per day!

APPLICATIONS

AGRICULTURAL - Field crops and fruit orchards can be protected from damage by marauding birds with the strategic placement of ZON Guns. The effective operating radius ranges from 1 to 5 acres, depending upon the shape and topography of the field.

COMMERCIAL-INDUSTRIAL - bird strike hazard and health nuisance can be controlled with ZON Gun placements, in critical areas such as airports, military bases, disposal sites, public parks, etc.

PREDATOR CONTROL - Zon Guns are also effective in deterring pest deer, coyote, geese, etc.

**THE MOST
EFFECTIVE
BIRD BANGER**

**ZON MARK 4
SERIES**

THE MOST EFFECTIVE SOLUTION TO BIRD PROBLEMS!

(cost just pennies a day!)

ZON MARK 4

(Standard Model - 91006)

Latest in design, the MARK 4 is re-engineered for better performance featuring the "Piezo" lighter without using flints, flint wheels or batteries.

- TOUGH CONSTRUCTION FOR ALL-WEATHER OPERATION
- FEWER MOVING PARTS - SIMPLE LOW-COST MAINTENANCE
- STABLE FRAME DESIGN PREVENTS MOVEMENT WHEN DETONATING
- DETONATION INTERVALS ADJUSTABLE FROM UNDER 2 MINUTES, UP TO 30 MINUTES
- LOW GAS CONSUMPTION, A 20 LB. PROPANE GASTANK DELIVERS APPROXIMATELY 17,000 EXPLOSIONS
- OPTIONS:
 - ZON MARK 4 TRIPOD
 - ZON GT 300 AUTOMATIC TIMER

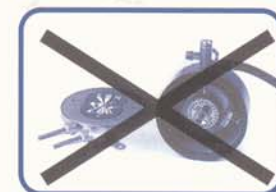

ZON MARK 4 TRIPOD

(Rotating Tripod Model - 92006)

For greater coverage, the MARK 4 tripod set-up is recommended. The higher placement amplifies the sound volume to cover greater area.

- DOUBLE COVERAGE BY CHANGING DIRECTIONS OF DETONATIONS WITH EACH BLAST
- ADJUSTABLE TRIPOD LEGS FOR UNEVEN GROUND
- CAREFULLY BALANCED FOR MAXIMUM STABILITY
- TRIPOD ELEVATES THE ZON 4', AND CAN BE EXTENDED TO 6' OR 7.5'

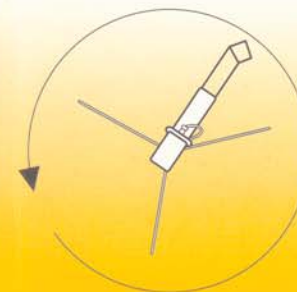

ZON AUTOMATIC TIMER

(GT 300)

Automatically starts and stops operation of gun each day at any desired time.

- ENCLOSED IN WEATHER AND DUST PROTECTIVE CASE
- HIGH QUALITY QUARTZ MOVEMENT
- RUNS A FULL SEASON ON ONE PENLIGHT BATTERY (1.5 VOLT)

TRIPOD SET-UP PROVIDES COMPLETE 360° COVERAGE

Each detonation pivots the ZON Gun 50-70 degrees in full circle
